

METHOD OF PREVIEWING CONTENT IN A DISTRIBUTED COMMUNICATIONS SYSTEM

Abstract of the Disclosure

5 A method of previewing content in a distributed communications system (100)
includes receiving categorized content (210) at a remote communications node (104). The
categorized content (210) is then evaluated and assigned contextual audio content (220).
The categorized content (210) is then previewed utilizing the contextual audio content
(220). Contextual audio content (220) can be user-provided and user-defined in order to
10 enrich the distributed communications system (100) environment.
